

RARE BASIC LTD

Rare Basic's ranges of uniquely sculpted 'bodyforms' lend themselves beautifully to producing striking displays. Months of research and development, has enabled the body-forms, crafted by a former Madame Tussauds sculptor, to encapsulate the exact shape of today's typical body.

These realistic bodyforms are versatile and can be used for all types of clothing. Rotationally moulded, and available in translucent candle wax, a variety of natural stone finishes, flocked, tinted or sprayed, they are sensational and unbreakable.

The new 'Sculpture Brought to Light' range illuminates every contour of the female body, making them ideal for displaying swimwear, lingerie and fine evening wear. They were recently used to stunning effect for Marks & Spencer's Head Office Lingerie and Swimwear launch.
